Notes on the Tables	iv	2.1.1–2.4.5 — Fertility	74
List of Tables	v	3.1.1–3.3.4 — Preferences for Number and Sex of Children	214
The Tables:		4.1.1–4.6.2 — Knowledge and Use of Contra- ception	304
1.1.1–1.6.3E — Union Status and Exposure to Childbearing	1	5.1.1–5.3.3E — Use of Contraception as Related to Fertility Preferences	435

NOTES ON THE TABLES

(1) In all tables where means are shown, these are calculated using only responses for which a specific number has been recorded. In other words, 'not stated' cases are omitted.

(2) All mean ages in the tables have been calculated on the basis of *completed* years. The correct means, therefore, are in all cases 0.5 years greater than those shown in the tables.

(3) In Tables 1.4.1–1.4.2(2)E, the following abbreviations have been used:

N denotes the number of cases;

M denotes the mean number of months;

R denotes the average percentage of time (ratio).

(4) In some tables showing union status (initial or current) the following abbreviations have been used:

M denotes married unions;

CL denotes common law unions;

V denotes visiting unions;

S denotes single — i.e. not currently in a union.

This is particularly relevant for tables using the variable *pattern of contraceptive use* in which the initial type of union precedes the current type of union. Thus,

M–M denotes initially married and currently married;

CL–M denotes common law and currently married.

(5) In Tables 4.1.3–4.1.5, in order to have 24 completed months of observation, the responses of '24 months' have been divided into two equal parts. The first of these, denoted by '24*' represents duration of 23.5 to 24.0 months, and is included in the calculations of the means. The second denoted by '24**' represents durations of 24.0 to 24.5 months, and is excluded from the percentage distribution and from calculation of the mean. It has been combined with the category '25+' which is included for the sake of completeness.
